

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PUBLISHER TO THE UNIVERSITY OF OXFORD
LONDON, EDINBURGH
NEW YORK

PREFACE.

A KNOWLEDGE of the theory and practice of accounts is an important part of the education of every man. It enables him to exercise a due control over his own affairs, or the affairs of others which may be intrusted to him. If he is a merchant, he can ascertain with ease and certainty what he possesses, and whether or not his means justify him in entering into certain speculations and investments. He can see which of his investments have proved profitable and ought to be pursued, and which unprofitable and ought to be discontinued; and he is able to provide to a large extent against error and fraud in the conduct of his business. If he is simply in the receipt of an income from professional or other sources, he knows exactly how his income has accrued, and how it has been spent or invested. He can compare his expenditure for similar objects during different periods, and has his attention directed to any heads under which he may with advantage retrench.

Such a knowledge, however, is not at all common. The reasons are, that its great value does not seem to be generally appreciated, and that the subject is seldom properly taught.

A knowledge of book-keeping does not imply an extensive knowledge of business. The former can be acquired by study, the latter by experience only. It is not our intention to attempt a description of every variety of transaction which occurs in the course of business, but to lay down and illustrate those general principles by the intelligent application of which all problems in book-keeping can be solved.

LONDON, *August 1*, 1868.

A short chapter has been added in the Second Edition on the application of the system of Double Entry to Public Accounts.

LONDON, *March 5*, 1869.

A number of Exercises in Book-keeping, set by the authors as examination papers on various occasions, has been added in this New Edition.

LONDON, *Feb. 1*, 1874.

The Profit and Loss Accounts and Balance Sheets of the Exercises are added in this Edition for the guidance of teachers and students.

LONDON, 1885.

EXERCISES IN BOOK-KEEPING	93
RESULTS OF THE EXERCISES	127

BOOK-KEEPING.

Accounts may be defined as registers of facts relating to money. The fundamental principle of keeping these registers is that they shall be complete records of such *facts*, and of *facts* only.

In very ancient times accounts were kept by means of tallies and chalk-marks, but for many centuries it has been the custom to reduce them into writing and to record them in books. To this operation the term 'Book-keeping' has been applied.

A mere chronological register of pecuniary facts was soon found insufficient. From such a register the merchant could not tell, without going through every item, how he stood in relation to his various customers, and whether his business was profitable or not. It became necessary that his transactions should be also classified under the names of the various persons dealt with and of the various articles dealt in. This grouping of transactions in separate accounts for the various persons and articles affected by them, led gradually to a perception of the fact that *every* pecuniary transaction has a twofold effect. It became evident that every such transaction is a transfer of money or money's worth, and, being a transfer, that it necessarily involves a giver and a

receiver, and requires an entry to be made both in the account which is diminished, and in the account which is increased. The application of this principle resulted in the method of 'Double Entry'—a method equally applicable to every description of accounts, whether commercial, public, fiduciary, or private; a method simple in its design, and perfect in its results.

Double Entry in a crude and imperfect form appears to have been known to the ancient Greeks and Romans; and there is no doubt that by every merchant or trader, at however remote a period, who endeavoured to record his transactions with exactness, it must have been to some extent employed. Take a very simple case: a corn-dealer who chalked upon the vessel in which he kept his corn the number of measures taken out, and upon his door the number supplied to his customers, under a special mark for each, kept these accounts by Double Entry in a crude form. It was not, however, till A.D. 1495 that the first treatise on book-keeping was produced. It was the work of an Italian teacher, Luças de Burgo, who detailed the system in use by the intelligent merchants of his day in the trading towns of Italy, since known as the Italian system. This plan, providing, as it did, for the record of the twofold effect of every pecuniary transaction, embodied the vital principle of the method of 'Double Entry;' and although the details and mode of applying the principle have naturally been improved with subsequent experience, yet, under all varieties in the actual practice, the principle itself remains the same.

To record the twofold effect of each transaction involves two separate operations. What is parted with must be deducted from the account (that is the collection

of items) from which it is taken, and what is received in exchange must be added to the account which is increased by it. Instead however of subtracting the amount parted with from each account, experience at a very early period shewed that it was a more convenient and better plan to appropriate one part of each account to the entry of amounts received, and another to the entry of amounts parted with, leaving the state of each account to be ascertained by a comparison of the two parts of it. The book in which all transactions are so classified and arranged is called the Ledger.

In **The Ledger**, therefore, each account is divided vertically into two parts: the one on the left hand, which is technically called the *debtor* side; the other on the right hand, which is technically called the *creditor* side. At first sight the aptness of these terms, except in so far as they are correlative, is not very striking. It becomes so, however, when illustrated by an example between persons. Thus, if A parts with anything to B; *to the extent of that thing's value and so far as that transaction is concerned*, B is A's debtor. And if A receives anything from B; *to the extent of that thing's value and so far as that one transaction is concerned*, B is A's creditor.* The same is true in the case of articles, or of gains or losses, as well as of persons. For all accounts in the Ledger may be regarded as accounts of persons, that is, as accounts either of the merchant himself, or of persons entrusted with commodities on his behalf (see p. 7), or of

* It cannot be too carefully borne in mind that in determining the effect of a particular transaction, that transaction *alone* is to be considered. Thus, I may owe John Smith £100, but when I pay him £20, so far as that payment is concerned he is my debtor for £20.

the persons with whom he deals. In book-keeping sense, however, the term 'personal accounts' is applied only to accounts of persons with whom the merchant deals; while the term 'impersonal'* is applied to the several accounts in which the merchant's property is classified and his gains and losses recorded.

Every transaction is, as we have said, a transfer, and involves a giver and a receiver. Each account therefore, whether personal or impersonal, is the debtor of some other account for what it receives, and the creditor of some other account for what it parts with. If any pecuniary transaction occasions a gain or a loss, such gain or loss appears in the account where it has accrued.†

The words 'Debtor' and 'Creditor' are usually written **Dr.** and **Cr.** Each entry on the Dr. side of an account in the Ledger is prefaced by the word **To**, that is, debtor to; and on the Cr. side by the word **By**, that is, creditor by. To enter on the Dr. side of an account is called to debit the account; to enter on the Cr. side of it, to credit the account.

The difference between the totals of the entries on the two sides of an account is called its **Balance**. If the sum of the entries on the Dr. side of an account is greater than the sum of the entries on the Cr. side of it, the difference is called a Debit balance. If the sum of the entries on the Cr. side of an account is greater than the sum of the entries on the Dr. side of it, the difference

* Sometimes these accounts are further divided, and described as 'real' or 'nominal' accounts, according as they represent property, or gains and losses.

† See foot-note on p. 8.

is called a Credit balance. An account is said to balance when the credit and debit sides are of the same amount.

A man's property and the sums owing to him are called his **Assets**; the sums owing by him, his **Liabilities**. The surplus of his assets over his liabilities constitutes what is termed his **Capital**.

We now proceed to illustrate the principle of Double Entry by analysing a series of dissimilar transactions, and shewing that however they differ in their nature and effect from one another, yet each has a distinct and intelligible twofold operation. The following examples are supposed to be taken from the consecutive register of John Ward's pecuniary transactions. This register, being a complete record of the facts relating to his business, begins with a list of his assets and liabilities. It contains a statement of all the goods he buys and sells, of all the money he receives and pays, and of all his other pecuniary transactions. In this imaginary series of transactions we have, for the sake of simplicity, omitted all merely explanatory details. But the original registers of actual transactions, though concise, should be so comprehensive as to leave no possibility of doubt arising as to the nature of every item recorded.

The first arrangement which suggests itself in recording transactions as they occur is that their money value should be entered in a part of the record appropriated to the purpose. This is generally accomplished, as in the following examples, by having a column for money on the right hand side of the page.

John Ward's Assets and Liabilities at commencement are as follows:—

	£	s.	d.
ASSETS—			
{ Due to him by T. Jones	100	0	0
{ Wine on hand	1000	0	0
{ Cash on hand	200	0	0
	1300	0	0
LIABILITIES—Due by him to J. Smith	50	0	0

His transactions during the first month are as follows:—

	£	s.	d.
* (1) Sold Wine for Cash	10	0	0
(2) Bought Wine for Cash	100	0	0
(3) Sold J. Smith, Wine	50	0	0
(4) Bought of F. Brook, Wine	75	0	0
(5) Received T. Jones's acceptance in payment of amount due †	100	0	0
(6) Accepted F. Brook's draft ‡	75	0	0
(7) Lent Cash to J. Smith	20	0	0
(8) Paid Salary of Clerk	10	0	0
(9) Paid Cash for Insurance	10	0	0
(10) Discounted T. Jones's acceptance for £100, and received in Cash £99, and allowed for discount £1	100	0	0
(11) Bought Wine of F. Brook	100	0	0
(12) Paid F. Brook Cash £98, and was allowed Discount £2	100	0	0
(13) Consigned to P. Walker, to be sold by him on my account and risk, Wine invoiced § at	225	0	0
(14) Received Cash from P. Walker on account of Consignment of Wine	100	0	0
(15) Received Account Sales from P. Walker, shewing that the above Consignment of Wine realized (net)	285	0	0
(16) Received in Cash from P. Walker the balance of the amount realized by the sale of the Wine consigned to him	185	0	0
(17) Paid Cash for purchase of Business Premises	300	0	0

* The numbers opposite each item refer to corresponding numbers given in the Ledger hereafter.

† T. Jones, instead of paying cash down, gives an undertaking, on stamped paper, to pay £100 on a specified day.

‡ John Ward, instead of paying cash down, gives an undertaking, on stamped paper, to pay £75 on a specified day.

§ An invoice is a document which describes the nature, quantity, and prices of the goods, and the names of the purchaser and the seller.

|| An Account Sales is an account of merchandise sold, rendered by the person to whom they were consigned.

* The first pecuniary fact that John Ward has to deal with is the state of his affairs at commencement. It is manifestly of importance that he should be able to see at one view what the amount of his capital is, he therefore opens an account for this purpose in the Ledger under his own name—'John Ward (Capital account).' Sometimes this account is opened under the title of 'Stock.'

An account is opened in the Ledger by writing the name of it either across the head of both sides, or only on the Dr. side, with or without the word *Contra* on the Cr. side, at the option of the book-keeper. The title of each account should be as brief as possible, and yet so exact as to admit of no doubt arising as to its nature. The Ledger should be paged throughout, and provided with an index in which each account should be entered in alphabetical order with the number of its page, for facility of reference.

He first enters his assets in separate accounts for 'T. Jones,' 'Wine,' and 'Cash.' 'T. Jones' being his debtor for £100, he enters £100 on the Dr. side of T. Jones's account. He treats 'Wine' and 'Cash' as persons entrusted with these commodities on his account, that is, as his debtors for £1,000 and £200 respectively, and he enters, accordingly, £1,000 on the Dr. side of the 'Wine' account, and £200 on the Dr. side of the 'Cash' account.

'T. Jones,' 'Wine,' and 'Cash' being thus regarded as his debtors for the several sums of £100, £1,000, and £200, he is their creditor for those amounts, which he therefore enters on the Cr. side of his own account—'John Ward (Capital account).' This entry he may make, as has been done at p. 13, in one total amount, £1,300.

* The student should now refer to pp. 13-15, and follow carefully the entry of each transaction in the Ledger.

The words technically used in making the entry in the Ledger to describe such an aggregate of accounts are, '**By sundries,**' that is, by the amount of sundry accounts.

He next enters his liabilities. J. Smith is his creditor for £50. He therefore opens an account for J. Smith, and enters £50 on the Cr. side of it. Being J. Smith's debtor for £50, he enters £50 on the Dr. side of his own account — 'John Ward (Capital account)' — which now shews all his assets and liabilities.

This entry, under the proper heads, of the state of a man's affairs is called **opening the books**. As the assets and liabilities are entered in separate accounts, on the Dr. and Cr. sides respectively, and the *totals* of the assets and liabilities are entered in the general account — 'John Ward (Capital account)' — on its Cr. and Dr. sides respectively, therefore by the axiom, 'The whole is equal to the sum of its parts,' the totals of the debit and credit entries must agree.

His first transaction is—

(1) * *Sold Wine for Cash* £10

Here his cash is increased by an addition of £10, and his wine is lessened, to the value of £10, by wine parted with. In other words, 'Cash' increases its liability to him by £10, and 'Wine' lessens its liability to him by the same amount. He therefore enters £10 on the Dr. side of the 'Cash' account, thereby increasing it by £10, and, instead of deducting £10 from the Dr. side of the 'Wine' account,

* This and similar transactions may cause a gain or a loss, and to the extent of such gain or loss his capital is affected. But it would generally be very difficult, and often impossible, to tell exactly what the gain or loss on each individual transaction has been. He therefore postpones for the present any entry under his Capital account, leaving the net gain or loss on all the transactions recorded to be ascertained, and transferred to that account in one amount, when he closes his books (see pp. 16, 17).

he does what has precisely the same effect (see p. 3), he enters £100 on the credit side of it.

- (2) *Bought Wine for Cash* £100

Here Wine is increased by £100, and Cash lessened by £100. He therefore debits 'Wine' and credits 'Cash.'

- (3) *Sold J. Smith, Wine* £50

Here J. Smith becomes his debtor for £50. He therefore debits J. Smith's account with that amount. Wine is lessened by £50. He therefore credits 'Wine' with £50.

- (4) *Bought of F. Brook, Wine* £75

Here Wine is increased. He therefore debits 'Wine' with £75. Not having paid Brook for the wine, Brook becomes his creditor for £75. He therefore opens an account for 'F. Brook,' and credits him with £75.

- (5) *Received T. Jones's acceptance in payment of amount due* £100

Had Jones paid his debt in money, 'Cash' would have been debited as in (1). But Jones has paid by handing over a bill* which becomes part of John Ward's property, and of which it is necessary that an account should be kept. Ward therefore opens such an account under the title of **Bills Receivable**, and debits it with £100, the amount of the bill received by him. 'T. Jones' having given the bill, is credited with the amount of it.

It must be remembered, however, that Jones has only exchanged one form of liability for another, and that the 'Bills Receivable' account represents, in its aggregate, persons liable for the payment of bills of exchange.

- (6) *Accepted F. Brook's draft* £75

His liability to F. Brook being thus contingently dis-

* For description of 'bills,' see p. 26.

charged, he debits 'F. Brook' with £75. But what account is he to credit? Had he paid in money he would have credited 'Cash' as in (2), but as he has paid by giving a bill, it is necessary that he should open an account for **Bills Payable** by him. This account he credits with £75, the amount of F. Brook's draft.

The effect would have been similar if, instead of giving Brook a bill, he had got a temporary advance of £75 in cash to meet the payment. In that case he would have credited the lender with the advance of £75; in this case he credits 'Bills Payable.'

'Bills Payable' thus represents, in aggregate, persons to whom the merchant is indebted for payments postponed until fixed dates upon his written promises to pay.

(7) *Lent Cash to J. Smith* £20

Here Smith becomes his debtor for £20, and Cash is lessened by that amount. He therefore debits 'Smith' and credits 'Cash.'

(8) *Paid Salary of Clerk* £10

Here Cash is lessened by £10. He therefore credits 'Cash.' But what account is he to debit, having received no description of property in exchange? His assets are reduced by £10, and he might at once debit his own account—'John Ward (Capital account)'—with £10. But a chief object of book-keeping being to shew the result of his transactions in respect of profit and loss, and how both arise, it is necessary to open accounts which shall exhibit on the one hand the gains and on the other the losses and expenses. One class of expenses is 'Salaries.' He accordingly opens an account under that head, and debits it with £10.

- (9) *Paid Cash for Insurance* £10

This transaction is similar to the last. He credits 'Cash' with £10 and opens an account for 'Insurance,' which he debits with £10.

- (10) *Discounted T. Jones's acceptance and received
in Cash £99, and allowed for Discount £1 . . .* £100

Here he parts with one of the bills receivable by him. He therefore credits the account of 'Bills Receivable' with £100.* As he receives £99 in cash, he debits 'Cash' with that amount. He incurs an expense of £1 in discount. His assets consequently are reduced by £1. As in (8) and (9), he raises an account for 'Discount,' which he debits with £1.

- (11) *Bought Wine of F. Brook* £100

Here, as in (4), he debits 'Wine' and credits 'F. Brook.'

- (12) *Paid F. Brook £98 in Cash, and was
allowed Discount £2* £100

As the whole liability of £100 to F. Brook is discharged by this transaction, he debits 'F. Brook' with £100. Cash is lessened by £98. He therefore credits 'Cash.' He gains £2 by discount, increasing his assets by that amount, he therefore credits 'Discount' with £2.

- (13) *Consigned to P. Walker, to be sold by him on
my account and risk, Wine invoiced at . . .* £225

Here his stock of wine at home is decreased by the value of the consignment. He therefore credits 'Wine' with £225. P. Walker being simply his agent and not the purchaser of the wine, cannot be debited. It is necessary however that

* It must be borne in mind, however, that Ward is liable to the discount of the bill in the event of its being returned dishonoured, that is, if Jones fails to pay it when it becomes due.

he should open an account to shew where his property is. This he does under the descriptive title, 'Consignment of Wine to P. Walker,' and he debits it with the invoiced value of the wine, viz. £225.

- (14) *Received Cash from P. Walker on account of Consignment of Wine* £100

He now opens an account for 'P. Walker,' which he credits with the £100, and he debits 'Cash' with the receipt of £100.

- (15) *Received Account Sales from P. Walker, shewing that the above consignment of Wine realized (net)* £285

P. Walker now becomes his debtor for the amount realized. He therefore debits the account of P. Walker and credits 'Consignment' with the amount realized, viz. £285.

- (16) *Received Cash from P. Walker, being balance of amount realized by consignment of Wine . . .* £185

P. Walker is now no longer his debtor. He therefore credits 'P. Walker' with £185, which balances his account, and he debits 'Cash' with the receipt of the same amount.

- (17) *Paid Cash for purchase of Business Premises . .* £300

He has now converted part of his cash into another description of property, for which it is necessary to open an account. This he does under the title of 'Business Premises,' debiting it with the £300, and crediting 'Cash' with the same amount.

The entries of the foregoing transactions stand in his Ledger as follows:—

LEDGER.

Note.—The accounts are placed in the following order as the most convenient for explaining the process of balancing (pp. 16-19).

Dr. JOHN WARD (CAPITAL ACCOUNT). **Cr.**

	£	s.	d.		£	s.	d.
To J. Smith	50	0	0	By Sundries	1300	0	0

Dr. BUSINESS PREMISES. **Cr.**

(9) To Cash.	10	0	0				
----------------------	----	---	---	--	--	--	--

Dr. DISCOUNT. Cr.

(10) To Bills Receivable	1	0	0	(12) By F. Brook	2	0	0
--------------------------	---	---	---	--------------------------	---	---	---

In order to ascertain the gain or loss resulting from the transactions recorded, he proceeds as follows:—

He first abstracts the totals of all the Dr. entries and of all the Cr. entries from his Ledger. As for every transaction the Dr. entry (or entries) is equal to the Cr. entry (or entries), the totals of the Dr. and Cr. sides, if the entries are correctly made, must agree.

This operation, which is a most valuable check upon the arithmetical accuracy of the entries, is called making a **Trial Balance**.

The trial balance of the foregoing Ledger is as follows.
viz.:—

TRIAL BALANCE.

	DRS.			CRS.		
	£	s.	d.	£	s.	d.
John Ward (Capital Account)	50	0	0	1300	0	0

Finding the totals of the Dr. and Cr. entries agree, he proceeds to make what are called *closing entries*; strictly, they ought to be called *equalising entries*. No such entries are required in accounts where the totals of the Dr. and Cr. sides are equal, for such accounts are already closed. In these cases he merely inserts the total on each side, and draws a line underneath.

Where the totals of the two sides do not agree, he transfers the difference or balance, so far as it represents a gain or a loss, to a general account of 'Profit and Loss;' and the balance of this account of Profit and Loss he transfers to his own account—'John Ward (Capital account).' The remaining balances represent

only assets or liabilities. He closes the accounts in which they appear by inserting such balance at the foot of the lesser side of each account, and also the totals which now agree. He then opens new accounts in the Ledger under the same titles, or, if there is room, continues the accounts on the same pages, and in these new accounts enters the balances on the proper side, that is, the side opposite to that on which they were entered to close the old accounts, thus maintaining the continuity of the record.

* His course is as follows: He first values his business premises. Having only recently purchased them, he fairly values them at the amount he gave for them, viz. £300. This amount, being an asset, he carries forward to a new account for 'Business Premises,' by crediting the old account, and debiting the new with £300.

He next ascertains the quantity and estimates the value of his goods on hand; in this case only wine. The operation by which this value is arrived at is called Taking stock. We will assume that it amounts to £980. This asset he carries forward to a new Wine account by debiting it, and crediting his old Wine account with £980. On adding up the two sides of his Wine account, he finds that the total of the debits exceeds the total of the credits by £10. The debits being composed of his stock at commencement and his purchases, and the credits being composed of his deliveries and his stock on hand at the close, it is clear that he has made a loss on this account of £10. He now opens his general account of 'Profit and Loss,' and debits it with the loss of £10, on

* The student should now refer to pp. 19-22, and follow carefully each entry in the Ledger.

the same principle on which he debited 'Salaries,' an account subsidiary to 'Profit and Loss' (see p. 10); and he closes the old Wine account by crediting it with the loss of £10.*

He next takes his 'Cash' account. If that account has been correctly kept, his cash in hand must be the difference between the totals of the two sides of the account, viz. £56. This asset he carries forward to a new Cash account by crediting the old account and debiting the new account with £56.

His 'Bills Receivable' account shews no balance.

His 'Bills Payable' account shews a credit balance of £75. This liability he carries forward to a new Bills Payable account, by debiting the old account and crediting the new account with £75.

On J. Smith's account there is a debit balance of £20. This asset he carries forward to a new account for 'J. Smith' by crediting the old account and debiting the new with £20.

The accounts of 'F. Brook' and 'P. Walker' shew no balance.

The 'Consignment' account shews a credit balance of £60. The Consignment has all been sold. This balance therefore represents a gain, for it is the excess of the amount realized by the sale of the wine consigned, beyond its invoiced price. This gain of £60 he therefore carries to the credit of 'Profit and Loss,' closing the 'Consignment' account by debiting it with that amount.

* In practice, the entry in the Ledger of the gain or loss always precedes the entry of the balance in hand (although arrived at by the process described), in order that the same item may terminate the old account and begin the new account.

The accounts of 'Salaries,' 'Insurance,' and 'Discount' are all subsidiary to the general account of 'Profit and Loss.' He closes them, in the case of 'Salaries,' by crediting it and debiting 'Profit and Loss' with £10; in the case of 'Insurance,' by crediting it and debiting 'Profit and Loss' with £10; and in the case of 'Discount,' by debiting it and crediting 'Profit and Loss' with £1.

He now adds up his **Profit and Loss account**, which shews on the one side all his gains and how they arise, and on the other all his losses and expenses, and finds that it produces a credit balance of £31, which is his net gain on the transactions recorded. This balance of £31, being an increase to his capital during the period, he transfers to his own account—'John Ward (Capital account),'—by crediting that account and debiting 'Profit and Loss' with it.

The account 'John Ward,' which now shews a credit balance of £1281, he closes by transferring that balance to a new account for 'John Ward,' debiting the old account and crediting the new account with £1281.

The totals of both sides of each of the old accounts in his Ledger are now exactly equal, and the Ledger is said to be closed. It stands as follows:—

The new accounts have now been opened with the balances outstanding upon the old. These balances which represent the state of the concern at the close are as follows:—

	Dr. Balances.			Cr. Balances.		
	£	s.	d.	£	s.	d.
John Ward				1281	0	0
Business Premises	300	0	0			
Wine	980	0	0			
Cash	56	0	0			
Bills Payable				75	0	0
J. Smith	20	0	0			
	1356	0	0	1356	0	0

Every account in the Ledger has been adjusted to the same moment of time, and the actual state of the concern appears in the foregoing Dr. and Cr. balances, which are conveniently arranged in the following form, designated a Balance Sheet:—

Dr.		BALANCE SHEET.						Cr.	
LIABILITIES.		£	s.	d.	ASSETS.		£	s.	d.
To Bills Payable	75	0	0		By Business Premises..	300	0	0	
To John Ward's Capital	1281	0	0		By Wine.....	980	0	0	
					By Cash.....	56	0	0	
					By J. Smith	20	0	0	

From this it appears that the sum of £1281, at the credit of John Ward in the Ledger, is composed of assets of the value of £1356, less liabilities amounting to £75.

When the accounts commenced his assets were £1300, and his liabilities £50. The difference between the value of his assets less liabilities at starting, and his assets less liabilities at close, is £31, the amount appearing as the balance of the Profit and Loss account, which thus exhibits the process by which that result has been arrived at.

No doubt a merchant—provided he kept personal accounts with his customers, and knew how much he owed and how much was owing to him—might, without recording as we have done the full effect of every transaction, ascertain his profit or loss for any period by merely comparing the value of his assets less liabilities (if any), at starting, with the value of his assets less liabilities (if any), at the close, after making allowance for sums withdrawn by him. He could not tell, however, how the difference was occasioned. But by the system of Double Entry he knows exactly how his gains and losses have arisen, and how much of his gains have been consumed by various descriptions of expenses; because he keeps an account for every description of property on which it is desirable to know separately the gains and losses, for every description of expenditure for which he has received no property in exchange, and for every description of receipt in respect of which he has parted with no property. Further, the complete records which under this system are kept of each transaction, enable the merchant to act on all occasions with full knowledge; render it difficult for fraud committed on him to escape undetected; make the position of his affairs apparent; and furnish a self-acting check upon their own accuracy.

In manipulating the foregoing imaginary transactions we have carried each of them from the original con-

secutive record in which it appears directly to its proper accounts in the Ledger. We have shewn that the science of Double Entry consists in classifying in the Ledger all pecuniary transactions which occur in the course of business, that is in assigning each fact to its proper accounts. It will readily be perceived, however, that when the transactions are numerous, and many of them are similar in their nature, some classification in the original entry, in anticipation of their final classification in the Ledger, may with great advantage be made. The classification must necessarily to a large extent depend upon the nature of the business.

CASH BOOK.

Businesses of every sort involve the receipt and payment of money, and it is the universal practice to record all such transactions in a book set apart for the purpose, called the **Cash Book**. This book is the record of all moneys received and paid, and for purposes of convenience it is kept in Ledger fashion; that is, it is divided vertically, and the receipts are entered on the debit side and the payments on the credit side. Cash consists of money actually in hand and at the banker's, the Cash Book accordingly should contain the record of all receipts and payments of the banker on account of the merchant, as well as of the merchant himself. The process of checking the amount of cash in hand, a most necessary operation, and one of daily occurrence, is greatly facilitated by using separate columns for 'Banker's' and 'At Office.'

For petty disbursements a separate book is kept,

called the **Petty Cash Book**. This book is of the same form as the Cash Book. It contains on the debit side the amounts advanced to the Petty Cash keeper, and on the credit side the payments made by him.

BILL BOOKS.

Bills* are undertakings to pay certain sums at certain times, and until the times of payment arrive they supply the place of Cash. As instruments of exchange they are very important, and it has been found convenient for purposes of reference, as well as conducive to their final classification in the Ledger, to keep distinct records of them. Bills are of two sorts, those payable *by* the merchant, and those payable *to* him. The former sort are entered in a book called the **Bills Payable** book. The latter are entered, when received, in a book called the **Bills Receivable** book. These books are usually ruled in columns to shew all the particulars of each bill—in fact to afford a complete abstract of it. They are generally furnished with two additional columns, one for the entry of a series of consecutive numbers, written also on the bills, for identification and facility of reference, and another to shew how each bill has been disposed of.

BOOKS FOR SALES AND PURCHASES, INSURANCES, &c.

The form and number of these books must necessarily depend upon the nature and extent of the business. The great point to be aimed at in their construction is to

* See page 80.

provide separate books, or parts of books, for the entry of all transactions which similarly affect the same heads of account in the Ledger, in order that *totals* under each head may be arrived at from these books. A large amount of repetition in describing the particulars of similar transactions may often be avoided by a judicious use of columns and printed headings.

The classification of the original entries—in Cash Books, in Bill Books, and in Books for Sales and Purchases—materially lessens the labour of recording them in the Ledger. But this labour may be still further lessened and the classification consolidated by the employment of another book, called the **Journal**.

JOURNAL.

The Journal collects at convenient periods, usually monthly, the sums of all the transactions appearing in the various original records, and puts them in exact shape for entry in the Ledger, designating the side of each account in the Ledger on which the values are to be placed. The Journal also contains, and may be the original record of, all items which do not fall under the classification of Cash Books, Bill Books, &c., such as transfers from one account to another, or transactions between the partners of a concern. In journalizing (that is, entering in the Journal) any transaction, or group of similar transactions, the receiving account is entered as Dr. to the delivering account for the amount of the transaction. Thus the Journal entry of—

Sold Wine for Cash £10

is 'Cash Dr. to Wine, £10.' Further description of the transaction may be given in the Journal if necessary. Thus:—

Cash Dr. to Wine (for 5 doz. Sherry at 40s.) . . . £10

Such description is technically called The narration.

The Journal is usually ruled with two money columns: the one for the entry of all debits, the other for the entry of all credits. The totals of these columns for any period necessarily agree, and thus form a perfect check upon the totals of the debit and credit entries in the Ledger for the same period, thereby materially assisting the operation of balancing the Ledger. Where every item passes through the Journal the entries in the Ledger are purely mechanical. It is the practice, however, in many businesses to Post* each item directly from the Cash Books, Bill Books, Books for Sales and Purchases, Insurances, &c., to its proper head of account in the Ledger, and to pass the totals of these books only through the Journal. This plan, which we have illustrated in Appendix A, avoids much mere transcription; and as these entries in the Ledger are made daily, the state of the accounts of the various persons dealt with may be seen at any moment. The transactions which do not fall into the classifications accomplished by these books have to be journalized separately.

By means of these anticipatory classifications, completed by the Journal, the necessity of making two entries in the Ledger for each individual transaction is obviated, as the transactions are so collected and grouped that the

* To Post, in book-keeping sense, is to enter in Ledger.

result of several of them can be carried in total to the debit and to the credit of the accounts to which each individually relates. This condensation is not only most valuable for enabling us to arrive with ease and certainty at general results, but by avoiding mere repetition of details, it greatly lessens chances of error, and may, by a judicious division of the labour of entry, be made to act as a considerable check against fraud. It is, however, an indispensable condition of a condensation of items in the Ledger, that provision should be made, by means of references, for tracing the course of every individual transaction from its occurrence to its final record. Every set of books should be self-explanatory.

In trades where goods are sold in small quantities, it would involve an unnecessary amount of labour to keep an account for every article in the Ledger. In such cases one general account for Goods is found to be sufficient. This account should be debited periodically with the totals of all purchases and credited with the totals of all sales.

In the keeping of accounts there is no point of greater importance than the correct distribution of items, both of Receipt and Expenditure, under the heads of which **Capital** and **Revenue** are composed, Capital being the assets less liabilities, if any; and Revenue being the income derived from the Capital employed, shewn by the Profit and Loss account. Bearing in mind that Book-keeping, as is stated at p. 1, is a record of facts and of facts only, the student will perceive (1) that no expenditure should be placed or charged to Capital unless it has the effect of increasing the asset to which it is charged beyond the amount at which it is already valued in the books, and (2) that all receipts of money should be

credited to Capital which, issuing out of the assets, have the effect of reducing the assets (other than cash) below the amount at which they are valued in the books.

A periodical investigation into the value of the assets of any business is of great importance, and where the nature of the business and the character of the assets allow of the operation being satisfactorily performed, their value should be determined and the accounts of Capital and Revenue adjusted accordingly.

All expenditure which partakes of the nature of replacement, or the making good of wear and tear, clearly does not increase assets, and therefore should be charged to Profit and Loss. But all expenditure for additional buildings, or machinery, or for improvement of existing buildings or machinery, constituting absolute additions to their extent or efficiency, increases their value, and is therefore a legitimate charge to Capital. On the other hand, all receipts from the sale of premises or machinery lessen those assets, and ought to be credited to Capital.

It is a just and healthful provision in partnerships that the capital of the several partners be made subject to interest at a fixed rate, and that such interest form an element in the Profit and Loss account before its net balance is divided between them. Even where the concern belongs to one man, he should, before estimating his profits, calculate interest upon his capital invested.

The examples by which we have already illustrated the principle of Double Entry comprise every ordinary sort of financial transaction, and after a careful study of these the student will have no great difficulty in mastering the

fuller examples given in Appendix A. To become an expert book-keeper great practice is required; the examples given should be carefully worked by the student, and others should be set by the teacher. But the practice which is really valuable does not consist in copying transactions from one book to another, but in assigning each transaction to its proper heads of account.

The specimens given are of **Commercial** transactions, which, from their comprehensive range, afford the most varied illustrations of the principle of Double Entry, for the operations of commerce involve all those multifarious transactions of buying and selling, of lending and borrowing, of employing and being employed, from which profits and losses arise, as well as the receipt and appropriation of profits, and the disposition or appropriation of losses and expenses.

Bankers trade in money and bills. The business of **Insurance Companies** consists in the receipt, investment, and payment of money under certain specific conditions. **Railway Companies** derive their income from work done and services performed. **Private Accounts**, as a rule, merely record the receipt, appropriation, and investment of income. **Fiduciary or Trust Accounts** are generally of the nature of private accounts, though they are not unfrequently of a commercial character, in cases namely where Trustees carry on businesses for the benefit of others. **Public Accounts**, notwithstanding their enormous magnitude, present but little variety in the nature of the transactions recorded in them, inasmuch as, with few and comparatively unimportant exceptions, every receipt goes to form the national income, and every payment is made out of this income, and goes to form the national

expenditure. In other words, no accounts are kept to exhibit the value of the national assets, and the question of a distinction between Capital and Revenue does not arise for consideration in the formation of the national balance-sheet.*

The transactions involved in all these classes of accounts thus find their parallels in **Commercial Accounts**, and it is therefore unnecessary to give separate examples of them. And as every pecuniary transaction, to whatever class of accounts it may belong, has of necessity a twofold operation, it follows that the only *complete* record of such transactions, whether they be numerous and complicated or few and simple, is a Double Entry record.

Where the conditions of being entitled and receiving and of becoming liable and discharging are simultaneous, the Cash Book may contain the record of every transaction which takes place. In such cases the system of Double Entry is none the less applicable because all the transactions are of one kind. The accounts in the Ledger are debtors to the Cash account for money paid, and creditors for money received. And 'Cash,' of which the account is kept in the Cash Book, is debtor for all money received, and creditor for all money paid. This very simple plan of account is peculiarly well adapted for recording the income and expenditure of such institutions as hospitals, schools, and the like. Where the heads of account are few in number, this method may be still further reduced. The Ledger may be dispensed with and its functions performed by means of columns introduced in the Cash Book.

* See Appendix B.

* It has not been thought necessary to give the Petty Cash Book, shewing the particulars of this sum, as it is merely a record in order of date of the amounts spent for trifling trade expenses.

The transactions in the foregoing list, marked

C	for	Cash Book,
R	„	Bills Receivable,
P	„	Bills Payable,
B	„	Bought,
S	„	Sold,

are recorded directly in these books as they occur, and posted directly from these books to the Ledger, to the debit or the credit of their proper accounts. The remaining transactions, not being sufficiently numerous to be classified in special books for the purpose, are made the subjects of separate Journal entries.

If the Cash Book and Journal are kept by two separate persons, it is necessary that the one who keeps the Cash Book, as well as the one who keeps the Journal, should know which accounts, besides personal accounts, are required to be opened in the Ledger, as the account to which each item belongs has to be designated in the entry of it in the Cash Book.

The Appendix supposes that Messrs. Bruce & Williams require their stock to be kept under the two heads of 'Wine' and 'Brandy;' and their Profit and Loss account includes the following subdivisions, viz. 'Trade Charges,' 'Salaries,' 'Insurance,' 'Interest and Discount,' 'Commission,' 'Bad Debts.'

It will be observed that in accordance with a convenient plan (see pp. 42, 43), Messrs. Bruce & Williams's Cash Book is furnished with separate columns for 'Banker's' and 'At Office.' It is also furnished with columns for 'Discount,' so as to obviate the necessity of making a separate entry in the Discount account

in the Ledger for every item of discount received and allowed.

The cash transactions which we have given are not sufficiently numerous to fill either side of the Cash Book. It is well to mention, however, that it is usual when one side of an account either in the Cash Book or Ledger is full, to add up both, and to carry the totals forward to the next folio. It is usual also in such cases to draw a line diagonally across the side which is not full, to show that the blank is intentional.

We have given no instance in these transactions of a transfer between the moneys in the bank and the cash at office. Such transfers should appear on the face of the Cash Book only. The general account of 'Cash' in the Ledger is not affected by them.

" "	Stock of Brandy on hand	696	4	6

Separate Journal entries are made for each of the foregoing transactions, with the exception of the third, for which there is no entry required in the Journal.

Messrs. Bruce and Williams cannot credit T. Sandford with the invoiced price, as they are liable only for the proceeds, a sum not yet ascertained. They therefore merely record fully the fact of the consignment, but do not make it a matter of account in the Ledger. When they sell part of it, it will be seen that they credit Sandford with the amounts realized; and when they incur charges on account of it, they debit him with the amount of such charges. It is the practice, however, of many merchants, for convenience in making out Account Sales and Accounts current,* to keep a separate account of the consignment, and to transfer only the net proceeds to the credit of the consignor.

The Journal commences with the entry of the assets and liabilities of J. Bruce on 1st January. It contains separate entries for each of the above transactions, and collects the totals for the month of Cash, Bills, Purchases on credit and Sales on credit, from the foregoing books, for entry in the Ledger.

* An Account current is a Dr. and Cr. statement of transactions undertaken on behalf of a correspondent: Where interest, as is usually the case, is charged and allowed, the amount of it is ascertained periodically and the necessary entries made between the 'Interest' account and the personal account of the correspondent.

We have omitted all notice of *quantities* in the Ledger, but in practice it is often found of importance to enter them as a check upon the amount of goods in hand. This is more particularly the case in businesses where goods are bought and sold in bulk.

stead of under 'Sundries,' in order that the composition of this account may appear on the face of the Ledger.

PRIVATE LEDGER.

It will be observed that two separate accounts are opened in the Ledger for each partner. The 'Current Account' shews in detail all sums withdrawn, and all entries in respect of interest on capital and drawings, or profit or loss accruing, during the period to the close of which the books are balanced. By this means the 'Capital Account' is kept clear of details, and exhibits in a compendious form the progress and state of the Capital during the same period.

These 'Current' and 'Capital' accounts, and also the 'Profit and Loss' accounts, are frequently kept in a separate book accessible only to the proprietor of the concern, so that he alone has cognizance of the results of his operations, and the condition of his affairs. When this is done it is convenient to open in the General Ledger an account under the title of 'Private Ledger,' and to post into it without distinction all transactions coming under any head of account kept in the Private Ledger. By means of this account the general books are balanced, without recourse being had to the Private Ledger. In the Private Ledger one account is opened for all the transfers from the General Ledger, and the various items of which this account is composed are there analysed and distributed under their proper heads, after which the general account of 'Profit and Loss' is made up, the 'Current' and 'Capital' accounts adjusted, and the Private Ledger balanced.

(1) FORMS OF BILLS OF EXCHANGE. (See p. 36.)

£715:0:0

London, 2nd January, 1867.

Two months after date, pay to my order the sum of seven hundred and fifteen pounds, for value received:

ACCEPTED
Payable at the Union Bank

To Messrs. Bruce & Williams,
London.

Bruce & Williams,
J. Smith.

[No. 1 is drawn by J. Smith and accepted by Messrs. Bruce and Williams. Relatively to Bruce and Williams it is a 'Bill Payable,' to J. Smith it is a 'Bill Receivable.']

(2)

£620 : 0 : 0

London, 5th January, 1867.

*Twenty-one days after date I promise to pay to Messrs.
Bruce & Williams or to their order the sum of six hundred and
twenty pounds for value received.*

W. Brown.

[No 2 being a promise on the part of W. Brown to pay £620 to Messrs. Bruce and Williams,
is to Bruce and Williams a 'Bill Receivable,' and to W. Brown a 'Bill Payable.']

APPENDIX B.

PUBLIC ACCOUNTS.

SOME further elucidation of the application of the system of Double Entry to public accounts than is given at pp. 31, 32 having been desired, it is proposed in the present chapter to trace so much of the course and treatment of public moneys as is necessary for that purpose.

It is not within the scope of an elementary treatise, even if it were practicable, to describe the multifarious channels through which the public income and expenditure flow, and the many checks and counterchecks which are necessary to provide against error and fraud in the collection and distribution of public moneys. Nor do we propose to treat of the control exercised by the Treasury over the receipt and expenditure of the public revenue, and the examination applied by the Department for Auditing Public Accounts. These points, however important, concern rather the financier than the student of book-keeping. What is intended, is to afford practical explanation for the information and use of persons engaged, or seeking to be engaged, in the keeping of this class of accounts.

We have already stated at page 32, that 'no accounts are kept to exhibit the value of the national assets.' Such accounts of assets as Manufacturing and Store Departments have to keep are *supplementary* only, and do not form part of the national balance-sheet.

The Revenue of the country, collected by the various officers of the Revenue Departments, passes through the receivers of these Departments into Her Majesty's Exchequer, and forms a fund called the 'Consolidated Fund.' Out of this fund, with few and unimportant exceptions, all issues of money on account of the public service are made.

The public expenditure, which is conducted by a large number of separate Departments*, belongs to two classes; the one, consisting of permanent specific charges authorized by Act of Parliament, called 'Consolidated Fund Charges;' the other, of charges approved by special votes of the House of Commons, called 'Voted Services.' The 'Consolidated Fund Charges' consist, principally, of the interest of the Funded Debt, and of certain fixed salaries and allowances. The 'Voted Services' provide for the maintenance of the army and navy, the collection of the revenue, and all the miscellaneous expenditure of the country.

The revenue for each year is adjusted with the view of meeting the estimated expenditure for each year. The actual receipts constitute the income, the actual payments constitute the expenditure. The annual balance-sheet of the country, therefore, becomes a gigantic cash account of revenue received under the various heads, and of its appropriation to the various services of the country.

The records of Her Majesty's Exchequer show the amounts paid in under the various heads of revenue, and the issues thereout on account of the various heads of expenditure; and a balance-sheet made out from these

* These Departments are hereafter designated, for sake of brevity, 'Expending Departments.'

data is of great value, and can be readily produced. But such an account can only be an approximation; for the revenue, after collection, necessarily takes time to find its way into the Exchequer, and the issues from the Exchequer are only advances to meet expenditure, and do not of themselves constitute final charges.

The Paymaster-General acts as the paymaster of the State. His records show the payments actually made by him, on the authority of the Expending Departments, on account of the various heads of service. But, inasmuch as his payments are necessarily in arrear of the orders issued upon him, and as many of these are merely advances to Sub-Accountants*, any account which he can furnish of the national expenditure, although closer than that procurable from the Exchequer records, is also only an approximation. The material for a final balance-sheet must necessarily be obtained from the various Departments in which the revenue is collected, and in which the expenditure on account of the public service is conducted. The national balance-sheet is thus a distributive consolidation of the balance-sheets of all these various Departments. In the records of these Departments, therefore, uniformity becomes essential, inasmuch as all items of revenue on the one hand, and of expenditure on the other, are component parts of the national balance-sheet. These records we shall now proceed to consider so far as is necessary for our purpose.

The whole income of the country is paid into Her Majesty's Exchequer, and, so far as its collection and receipt are concerned, there is no operation for the

* A Sub-Accountant is a public officer who has to render accounts of the appropriation of moneys intrusted to him for special objects.

treatment of which a parallel cannot readily be found in the examples already given.

As regards public expenditure, however, although the intelligent student will understand that each person or Department who makes a payment on account of services rendered to the public must be credited with the amount of it, and that the particular head of service for which the payment was made must be debited, yet he may not be able to see clearly how the entries should be made as between Her Majesty's Exchequer from which the money comes and the various services to which it is applied. We shall endeavour to explain this as briefly as possible.

All issues on account of the public service are made from Her Majesty's Exchequer under specific Parliamentary sanction. The objects and amounts of the 'Consolidated Fund Services' are fixed by permanent statutes. The annual charges for 'Voted Services' are submitted to the House of Commons in detailed estimates prepared by the various Expending Departments, each head of service being divided into a number of sub-heads. These estimates, except so far as they relate to special and non-recurring objects, are, or ought to be, prepared and considered with reference to the actual expenditure under each of the sub-heads during the past year, due allowance being made for any anticipated variation in the ensuing year. It becomes of the highest importance, therefore, that the same *form* of estimate should, as far as possible, be observed from year to year. The objects and amounts of these services are decided by votes of the House of Commons in Committee of Supply, and these votes receive full legislative sanction by being embodied annually in an Act of Parliament called the 'Appropriation Act.'

This Act defines the object of each vote, and the amount appropriated to 'defray the charges which will come in course of payment during the year.' Her Majesty's Exchequer, acting under an order from the Crown to whom the supplies are voted, makes issues from time to time on account of these services, never of course exceeding the total amount which Parliament has appropriated to each; and the Expending Departments are restricted by the Appropriation Act from applying the grant of a year to any other purpose than *to meet the payments to be made during the year*. The balance of any grant remaining unexpended at the close of a year must be surrendered to the Exchequer as a saving.

The Expending Department is further required to record its expenditure under the sub-heads of each grant, none of which may be exceeded except with the express sanction of the Treasury. If the total grant of a year from unforeseen causes has to be exceeded, such excess forms the subject of a special supplemental Vote of Parliament, and temporary provision for it is made by the Treasury out of a fund placed at their disposal for such purpose.

No money received by an Expending Department, from sales of old stores and such like, may be used in aid of the Vote. They form part of the national income (p. 83), and are paid into the Exchequer under the general head of 'Extra Receipts on Votes of Parliament.'

In the records of the Expending Departments an account is opened each year, under each separate head of service, for Her Majesty's Exchequer, from which the supplies flow. This account is debited and a 'general account' for each service is credited with the amount

which Parliament has assigned to it for the year. Even if there were any advantage to be derived from such a course, the balance* at the Exchequer would not admit of the sums appropriated by Parliament to each service being withdrawn at the commencement of each year and handed over to the Expending Department. The Exchequer is only called upon to make issues for each service as the money is actually required to meet payments on account of it. These issues are not made directly to the Expending Departments, but to the Paymaster-General, who acts as their banker. For the amount of these issues, reported each month to the Expending Department by the Paymaster-General, the account of 'Her Majesty's Exchequer' is credited, and an account opened for 'Her Majesty's Paymaster-General' is debited.

The Expending Departments instruct the Paymaster-General to make payments on account of various services and issue orders upon him for this purpose in favour of the several payees. These payments consist of two classes, technically called 'final payments' and 'imprests:' final payments being those made to the persons entitled to receive and keep the money, and imprests being advances or issues to Sub-Accountants. Sometimes the payees, more especially if they reside out of the country, acting under the instructions of the Expending Departments, draw bills upon these Departments which are payable by the Paymaster-General. These, when accepted, are treated in the books of the Departments as 'Bills Payable.' (See pp. 9, 10.)

* When the balance at the Exchequer is insufficient to meet the current expenditure of the country it is supplemented by money raised by means of Exchequer Bills. These Exchequer Bills constitute the 'Unfunded Debt.'

As soon as the orders for payment are issued on the Paymaster-General, those representing final payments are debited to the various sub-heads of service to which they refer (for all of these sub-heads separate accounts have to be opened in the ledger), and the imprests are debited to the personal accounts of the Sub-Accountants to whom they are made. But as these orders may not be cashed by the Paymaster-General for some time after issue, it is clear that he cannot at once be credited with the payment of them. An intermediate account therefore is opened under the title of 'Orders Payable,' which is credited with the amount of all orders drawn upon the Paymaster-General. The account of the Paymaster-General is credited and 'Orders Payable' debited with the amount of orders actually paid by the Paymaster-General. To put the Expending Department in possession of this information the Paymaster-General furnishes monthly a detailed list of the orders paid by him under each service. The balance of the 'Orders Payable' account thus shows the amount of 'Outstanding Orders,' that is, the orders which the Paymaster-General has been instructed to pay, but which have not been presented for payment. If any order after issue is for any reason cancelled instead of being paid, the sub-head of service debited with its issue is credited, and 'Orders Payable' is debited.

We have seen that Sub-Accountants are debited with the issues made to them by the Paymaster-General. They are also debited with any items of revenue which may be received by them, and the heads of revenue affected by the receipt are credited. Sub-Accountants are credited and the proper sub-heads of service are

debited with the final payments which the accounts rendered by them periodically show that they have properly expended under the instructions of the Department. They are also credited and the Paymaster-General debited with sums which they remit to him on account of their Department. Advances or imprests may pass through the hands of many Sub-Accountants before they are finally expended. In such cases the account of the Sub-Accountant who makes the transfer is credited with the amount of it, and that of the Sub-Accountant to whom it is made is debited.

At the close of each year, the 'General Account' of each service is debited with the amount of the net expenditure appearing under each of the sub-heads, and each of these sub-heads is credited with the amount so transferred. The account for 'Her Majesty's Exchequer' is credited and the 'General Account' for that year is debited with the amount of the saving (if any) on the grant when surrendered to Her Majesty's Exchequer (p. 85).

It frequently happens, more especially when several separate services are under the control of one Expending Department, that payments are made by Sub-Accountants on account of one service out of sums imprested to them from another. In such cases the amount expended by the Sub-Accountant, after due examination, is debited to the proper service, and he is credited. The cash accounts of the services are adjusted by instructing the Paymaster-General to transfer the amount from the service on account of which it was paid to the service out of which the advance to the Sub-Accountant was made. Or they may be adjusted by authorizing the Paymaster-General to reimburse to the Sub-Accountant the amount he has

expended out of the service to which the expenditure referred, thereby reinstating his balance under the other head of service.

Thus under these and many other circumstances adjustments of account may arise from other causes than error. These adjustments, or 'adjusting entries' as they are usually called, are frequently somewhat perplexing to the book-keeper, but they offer no real difficulty if he always clearly sets before him the fundamental principle of keeping accounts laid down at p. 1, 'that they shall be *complete* records of facts, and of *facts* only.'

It is no doubt the case, owing to the vast number and the uniform character of the details of income and expenditure, that the keeping of public accounts necessitates a large amount of mechanical and monotonous labour. But even this labour will be better performed if the persons charged with it understand the principles which govern their work, and so have an intelligent apprehension of the part which they are taking in the evolution of the results required for the formation of their Departmental balance-sheet, and the relation which that balance-sheet bears to the production of the grand final results which compose the general balance-sheet of the nation.

From the foregoing sketch of the course and treatment of public moneys, it will be seen that the transactions occurring in public accounts find their exact parallels in a merchant's 'Profit and Loss' account, in so far as that account records income received and its appropriation; and that the system of Double Entry is not only applicable to public accounts, but that without it no complete record can be effected, nor due security against error obtained.

In the case of Commercial accounts the importance of having the books closely entered up is not likely to be lost sight of, because the persons who manage the undertakings have a direct pecuniary interest in them. But in the case of public accounts, from the absence of any such interest, this practice is much less likely to be attended to, although it is equally important. For it not only enables the Accountant to furnish with ease and despatch accurate statements, brought down to the most recent date, of any branch of administration embraced in the accounts, but it also acts as a powerful check against the commission of fraud by securing its speedy detection.

Though on a smaller scale, the course of all moneys raised by local taxation, such as county and borough rates, is necessarily similar in its broad features to that already traced of public moneys; and the application of the system of Double Entry to this class of accounts may therefore be gathered from the illustrations already given.

APPENDIX C.

EXERCISES IN BOOK-KEEPING,

SET BY THE AUTHORS ON VARIOUS OCCASIONS.

ONE of the following sets of exercises being given to the pupil, he should be required to record the double effect of each individual transaction in the Ledger, as explained in the text, pp. 5-25. When he is able readily to assign any transaction to its proper heads of account, he should then treat the exercises in the more formal manner shown in Appendix A.

No. I.

On the 1st of January, 1858, Andrew Freeport began to trade with a Capital of £2000, consisting of—

Cash	£1000
Bills Receivable—	
Due 30th of March	£200
„ 28th of January	100—300
Wine	700
Total	£2000

1858		£	s.	d.
Jan. 4	Sold to John Falstaff a butt of Wine	150	0	0
„ 9	Sold to William Honeycomb 3 pipes of Wine	260	0	0
„ „	Received from William Honeycomb his acceptance, due 31st instant.....	250	0	0
	Abatement allowed (off sale of Wine to him)	10	0	0
„ 11	Bought of Dombey and Son 50 pipes of Wine.....	1000	0	0
„ 12	Paid in Cash to Dombey and Son	350	0	0
„ 14	Bought of James Thomson a cargo of Staves	550	0	0
„ 17	Sold to Dombey and Son the above cargo of Staves	600	0	0
„ 18	Accepted James Thomson's draft, payable 7 days after sight, due 28th instant	550	0	0

1858		£	s.	d.
Jan. 19	Sold to Philip Sidney 4 pipes of Wine	280	0	0
" 20	Sold to John Dryden 6 pipes of Wine	400	0	0
" 21	Received of Philip Sidney his acceptance due 28th February	280	0	0
" "	Discounted William Honeycomb's acceptance for £250, due the 31st instant; received Cash	242	10	0
" "	Allowed Discount	7	10	0
" 22	Bought of Dombey and Son 20 pipes of Wine	340	0	0
" "	Accepted Dombey and Son's draft, due 25th March	200	0	0
" "	Paid to them Cash	100	0	0
" 23	Received from John Dryden, Cash on account	220	0	0
" 24	Sold to Alexander Pope 2 pipes of Wine ...	120	0	0
" "	Bought of William Paley 60 pipes of Wine ..	1200	0	0
" 28	Received Cash for Bill Receivable, on hand 1st January, due this day	100	0	0
" "	Paid Cash, acceptance in favour of James Thomson, due this day	550	0	0
" 29	Received Cash of Alexander Pope	40	0	0
" "	Sold to H. Bardolph 10 pipes of Wine	450	0	0
" 30	Received of H. Bardolph, Cash on account ..	200	0	0
" "	Bought, and paid for the same in Cash, 15 pipes of Wine	600	0	0
" "	Paid Cash, Rent of Counting-house	7	0	0
" "	Ditto, Clerk's Salary	10	0	0
" 31	Interest on Capital accrued to this date: one month at 5 per cent. per annum on £2000	8	6	8
" "	Drew out Cash for private purposes	100	0	0
" "	Stock of Wine on hand at this date	2500	0	0

No. II.

On the 1st of January, 1859, Henry Grey commenced business with
a Capital of £2000, which consisted of—

Cash	£1000
Bills Receivable—	
Due 20th of January	£100
" 4th of May	150—250
Iron	750
Total	£2000

1859		£	s.	d.
Jan. 10	Purchased of Vulcan and Co., Iron	2000	0	0
" 12	Purchased of Cyclops and Co., do.	450	0	0

1859		£	s.	d.
Jan. 12	Sold to Mars and Co., Iron	3000	0	0
" "	Received of Mars and Co. their acceptance, due 4th April.....	1000	0	0
" "	And Cash	1500	0	0
" 13	Discounted with John Gride, Mars and Co's. acceptance, due 4th April, for	1000	0	0
" "	Received from John Gride, Cash	990	0	0
" "	And allowed Discount to him	10	0	0
" 14	Accepted Vulcan and Co's. draft, due 4th May	2000	0	0
" 15	Purchased of Vulcan and Co., Iron	800	0	0
" 16	Paid Cash to Vulcan and Co., in settlement of the foregoing purchase	770	0	0
" "	On being allowed by them an abatement of..	30	0	0
" "	Accepted Cyclops and Co's. draft, due 30th instant, in part payment of Iron purchased of them	200	0	0
" "	Cash paid to Cyclops and Co.	250	0	0
" 17	Cash paid for 2 weeks' Wages to Labourers	30	0	0
" "	Cash paid, freight on account of Iron	140	0	0
" "	Cash paid, Clerks' Salaries.	20	0	0
" 18	Cash received of Mars and Co., they having failed, 10s. in the £ in discharge of balance of £500 due from them	250	0	0
" "	Write off loss by Mars and Co.....	250	0	0
" "	Cash lent to John Minus at 5 per cent. in- terest	1000	0	0
" 19	Cash paid for horse-keep	15	0	0
" 20	Sold to Bellona, Iron.....	650	0	0
" "	Sold to Argus, Iron	380	0	0
" "	Received from Bellona, her acceptance, due 31st instant	650	0	0
" "	Received Cash for Bill Receivable, due this day	100	0	0
" 21	Cash paid for Petty Cash disbursements, to be accounted for	20	0	0
" 22	Bought of Tubal Cain, Iron	780	0	0
" 23	Sold to Mercury, Iron	600	0	0
" 30	Cash paid, acceptance in favour of Cyclops and Co., due this day	200	0	0
" 31	Charge John Minus with interest of loan of £1000 to this day	2	1	8
" "	Interest on Capital, one month, on £2000 ..	8	6	8
" "	Rent of Counting-house, due to John Nokes	15	0	0
" "	Drew out Cash on private account of H. Grey	300	0	0
" "	Cash paid, two weeks' wages to Labourers ..	30	0	0
" "	Stock of Iron on hand at this date	850	0	0

No. III.

On the 1st of January, 1860, George Wood, corn merchant, ascertained the state of his affairs to be as follows:—

His Assets consisted of—

Balance at the Bank of England	£300
Cash in the house	100
W. Smith's acceptance, due 23rd of May	£200
J. Francis' acceptance, due 1st of April	100—300
Balance due to him by A. Tod	500
Stock of Wheat	1500
Stock of Flour	500
On the other hand he owed to R. Smith for Cash lent at 5 per cent. interest	700
T. Jones for Wheat	500
Acceptance payable at the Bank of England, due 14th of January	400
Ditto, ditto, 10th of April	200

1860		£	s.	d.
Jan. 10	Purchased of W. Thompson 500 quarters of Barley at 40s.	1000	0	0
" "	Accepted W. Thompson's draft, in payment of Barley, at three months' date, for	1000	0	0
" 12	Sold to J. Howard 200 quarters of Wheat at 64s.	640	0	0
" 13	Received Cash from A. Tod on account of debt due by him	250	0	0
" "	Purchased of T. Mills 300 sacks of Flour at 50s.	750	0	0
" "	Paid Cash into Bank of England	300	0	0
" 14	Paid by the Bank of England my acceptance due this day	400	0	0
" 15	Purchased of H. Bacon, on joint account with J. Thomas, 250 barrels of American Flour at 40s.	500	0	0
" 19	Received Cash of J. Howard, and paid into Bank of England	624	0	0
" "	Allowed Discount to J. Howard, $2\frac{1}{2}$ per cent. on £640	16	0	0
" 22	Received Cash of J. Thomas, his moiety of cost of American Flour	250	0	0
" "	Paid Cash into Bank of England	250	0	0
" 23	Sold to H. Bacon 300 quarters of Barley at 42s. 6d.	637	10	0
" "	Paid Cash for Wharf Rent and charges on Barley	17	6	8

		£	s.	d.
1860				
Jan. 23	Discounted with Bank of England W. Smith's acceptance for £200 0 0			
	Net proceeds of Bill £197 13 4			
	Discount charged..... 2 6 8			
		200	0	0
" 24	Sold to H. Nilus 150 quarters of Barley at 50s.	375	0	0
" "	Sold to H. Bradley 250 barrels of American Flour, on joint account with J. Thomas, at 45s.	562	10	0
" "	Received Cash from H. Bacon, balance due from him	137	10	0
" 25	Sold to John Baker 400 sacks of Flour, at 48s.	960	0	0
" "	Received Cash of John Baker on account of same	700	0	0
" 26	Paid Cash into Bank of England	720	0	0
" "	Paid to T. Mills by cheque on Bank of England.....	740	12	6
" "	Discount allowed by T. Mills, 1½ per cent. on £750	9	7	6
" "	Cash taken for private expenditure	50	0	0
" "	Paid Cash for charge on Flour bought on joint account with J. Thomas	6	15	0
" 31	Cash paid to R. Hobbs for one month's Salary as Clerk.....	12	10	0
" "	One month's Interest on capital account to date	5	10	0
	Stock on hand 31st of January:—			
	300 quarters of Wheat at 60s.	900	0	0
	100 sacks of Flour at 50s.	250	0	0
	50 quarters of Barley at 40s.....	100	0	0
	Amount due 31st of January:—			
	To James Story for one month's Warehouse Rent	5	10	0
	To R. Brown for Stationery supplied	6	5	0

No. IV.

On the 1st of January, 1861, Charles Stuart ascertained that the state of his affairs was as follows:—

ASSETS.

Pig Iron, 400 tons at £4 per ton	£1600
Balance of Cash in hand	1400
O. Cromwell's acceptance, due 10th of January	500

DEBTS.

C. Stuart's acceptance, due 25th of January	570
---------------------------------------------------	-----

Transactions subsequently to 1st of January, 1861:—

1861		£	s.	d.	
Jan.	4	Purchased of Carron Company 200 tons of Pig Iron.....	900	0	0
"	5	Sold to J. Locke 300 tons Pig Iron	1400	0	0
"	"	Received of J. Locke his acceptance, due 8th March.....	1000	0	0
"	"	Received Cash of J. Locke	200	0	0
"	10	Cash Paid, freight and insurance on 200 tons Pig Iron	45	0	0
"	"	O. Cromwell's acceptance, due 10th instant, returned dishonoured.....	500	0	0
"	"	Cash paid, Notarial Charges thereon	1	10	0
"	12	Sold to J. Locke 200 tons Pig Iron	1000	0	0
"	15	Paid Cash to the Carron Company	900	0	0
"	17	Discounted J. Locke's acceptance for £1000			
"	"	Received Cash proceeds of bill	992	10	0
"	"	Discount charged thereon	7	10	0
"	18	Received of J. Locke his acceptance, due 4th April	800	0	0
"	21	Purchased of C. J. Mare and Co. 2000 Tons Iron Rails at £5 10s.	11000	0	0
"	23	Consigned to Pernambuco, on my own account and risk, to the care of Ewart and Co., of that place, 1000 tons Iron Rails at cost price of £5 10s. per ton	5500	0	0

FINN. The 'Junior' Euclid. By S. W. FINN, M.A. Crown 8vo. Books I and II, 1s. 6d. Books III and IV, 2s.

FISHER. Class-Book of Chemistry. By W. W. FISHER, M.A., F.C.S. Fourth Edition. Crown 8vo, 4s. 6d.

FOCK. An Introduction to Chemical Crystallography. By ANDREAS FOCK, Ph.D. Translated and Edited by W. J. POPE. Crown 8vo, 5s.

HAMILTON and BALL. Book-keeping. By Sir R. G. C. HAMILTON, K.C.B., and JOHN BALL. New and Enlarged Edition. 2s.

— Ruled Exercise Books, 1s. 6d.

— (Preliminary Course only), 4d.

HARCOURT and MADAN. Exercises in Practical Chemistry.

By A. G. VERNON HARCOURT, M.A., and H. G. MADAN, M.A. Fifth Edition. Revised by H. G. MADAN, M.A. Crown 8vo, 10s. 6d.

- HARGREAVES.** Arithmetic. By R. HARGREAVES, M.A.
Crown 8vo, 4s. 6d.
- HENSLEY, L.** Figures made Easy: a first Arithmetic Book.
Crown 8vo, 6d. Answers, 1s.
- The Scholar's Arithmetic. Cr. 8vo, 2s. 6d. Answers, 1s. 6d.
- The Scholar's Algebra. An Introductory work on
Algebra. Crown 8vo, 2s. 6d.
- JOHNSTON.** An Elementary Treatise on Analytical Geometry.
By W. J. JOHNSTON, M.A. Crown 8vo, 6s.
- JONES.** Notes on Analytical Geometry. By A. CLEMENT
JONES, M.A., Ph.D. Crown 8vo, 6s. *net*.
- MINCHIN.** Geometry for Beginners. An easy Introduction
to Geometry for Young Learners. By G. M. MINCHIN, M.A., F.R.S. 1s. 6d.
- NIXON.** Euclid Revised. Containing the essentials of the
Elements of Plane Geometry as given by Euclid in his First Six Books. By
R. C. J. NIXON, M.A. Third Edition. Crown 8vo, 6s.
- Book I, 1s. Books I, II, 1s. 6d. Books I-IV, 3s. Books V, VI, 3s. 6d.
- Geometrical Exercises from Nixon's 'Euclid Revised,'
with Solutions by A. LARMOR, M.A. Crown 8vo, 3s. 6d.
- Geometry in Space. Containing parts of Euclid's Eleventh
and Twelfth Books. By the Same. Crown 8vo, 3s. 6d.
- Elementary Plane Trigonometry; that is, Plane Trigonometry
without Imaginaries. By the Same. Crown 8vo, 7s. 6d.
- RUSSELL.** An Elementary Treatise on Pure Geometry. By
J. WELLESLEY RUSSELL, M.A. Crown 8vo, 10s. 6d.
- SELBY.** Elementary Mechanics of Solids and Fluids. By
A. L. SELBY, M.A. Crown 8vo, 7s. 6d.
- WARREN.** Experimental and Theoretical Course of Geometry.
By A. T. WARREN, M.A. Crown 8vo. Second Edition, revised. With
or without Answers. 2s.
- WILLIAMSON.** Chemistry for Students. By A. W. WILLIAMSON,
M.A., Phil. Doc., F.R.S. 8s. 6d.
- WOOLLCOMBE.** Practical Work in General Physics. By
W. G. WOOLLCOMBE, M.A., B.Sc. Crown 8vo, 2s. each part.
- Part I. General Physics. } Second Edition, Revised.
Part II. Heat.
Part III. Light and Sound.
Part IV. Magnetism and Electricity.

MISCELLANEOUS.

- BALFOUR.** The Educational Systems of Great Britain and
Ireland. By GRAHAM BALFOUR, M.A. Second Edition, revised. 8vo, 7s. 6d. *net*.
- BUCKMASTER.** Elementary Architecture for Schools, Art
Students, and General Readers. By MARTIN A. BUCKMASTER. With thirty-
eight full-page Illustrations. Crown 8vo, 4s. 6d.
- COOKSON.** Essays on Secondary Education. By Various
Contributors. Edited by CHRISTOPHER COOKSON, M.A. Crown 8vo, paper
boards, 4s. 6d.
- FARMER.** Hymns and Chorales for Schools and Colleges.
Edited by JOHN FARMER, late Organist of Balliol College, Oxford. 5s.
Hymns without the Tunes, 2s.

FOWLER. The Elements of Deductive and Inductive Logic.

By T. FOWLER, D.D. 7s. 6d.

— The Elements of Deductive Logic, designed mainly for the use of Junior Students in the Universities. With a Collection of Examples. 3s. 6d.

— The Elements of Inductive Logic, designed mainly for the use of Students in the Universities. Sixth Edition. 6s.

HULLAH, J. The Cultivation of the Speaking Voice. 2s. 6d.

SOMERVELL. Chart of the Rules of Harmony. By A. SOMERVELL. Crown 4to, on a card. 1s. net.

— Chart of the Rules of Counterpoint. Cr. 4to, on a card. 1s. net.

TROUTBECK and DALE. A Music Primer for Schools.

By J. TROUTBECK, D.D., and R. F. DALE, M.A., B.Mus. Crown 8vo, 1s. 6d.

UPCOTT. An Introduction to Greek Sculpture. By L. E.

UPCOTT, M.A. Second Edition. Crown 8vo, 4s. 6d.

HELPS TO THE STUDY OF THE BIBLE, taken from the Oxford Bible for Teachers. New, Enlarged and Illustrated Edition. Pearl 16mo, stiff covers, 1s. net. Large Paper Edition, Long Primer 8vo, cloth boards, 5s.

HELPS TO THE STUDY OF THE BOOK OF COMMON

PRAYER. Being a Companion to Church Worship. By W. R. W. STEPHENS, D.D., late Dean of Winchester. Crown 8vo, 2s. 6d. net.

THE PARALLEL PSALTER, being the Prayer-Book Version of the Psalms, and a new Version arranged on opposite pages. With an Introduction and Glossaries by the Rev. S. R. DRIVER, D.D., Litt.D. 6s.
